

Mission statement

WARPTTEK

- Supplies the technical textile industries with warp beams in a consistently high quality, in a timely fashion and with competitive pricing
- Utilizes the most modern equipment to meet highest standards regarding quality and productivity
- Actively seeks improvements and enthusiastically implements positive change in all areas of our activities
- Strives for the highest level of quality and integrity in all of our relations with employees, customers and suppliers
- Commits to minimal ecological impact
- Earns a healthy profit to ensure reinvestments into new production technologies and a possible, reasonable growth

Employee relations:

- We will only hire and support/train employees with the highest standards regarding ethics, quality awareness, flexibility, respect and integrity
- We will create a motivating, respectful and team-oriented work environment

Customer relations:

- We will attract and please customers working in the most demanding segment of technical applications

Supplier relations:

- We will attract and engage suppliers displaying the same high value standards that match ours regarding product quality, price, reliability, responsiveness, integrity and minimized ecological impact

WARPTTEK will exceed expectations
